

The Quick Guide to **Adding eSignatures to PDF Forms**

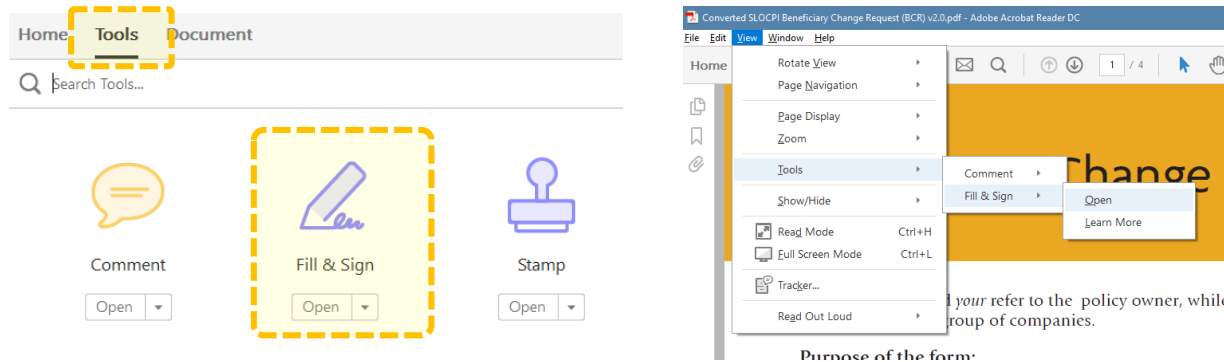

IMPORTANT

This is a Supplementary Guide and should not be considered as the only method of adding eSignatures. You may share the contents with your client when assisting them in adding their eSignature.

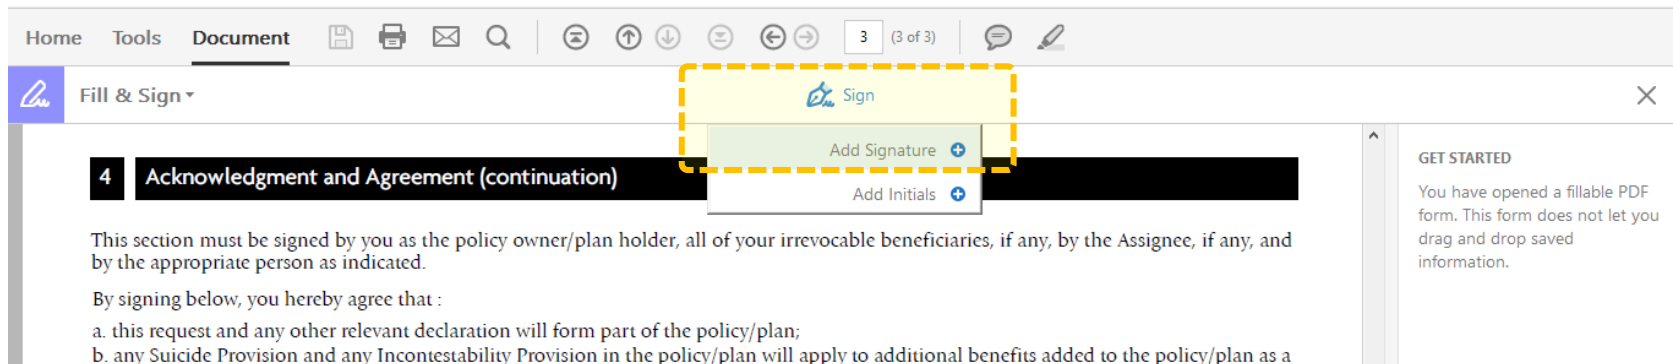

Adding eSignatures to Digital PDF Forms using a PC

Adding eSignatures to Digital PDF Forms using a PC

1. Download Adobe Acrobat at <https://acrobat.adobe.com/us/en/acrobat/pdf-reader.html> (Skip this step if Adobe Acrobat is already installed)
2. **Open Adobe Acrobat Reader**, then go to File > Open and select the policy servicing form that will be signed.
3. With the policy servicing form opened, select **Tools > Fill & Sign**

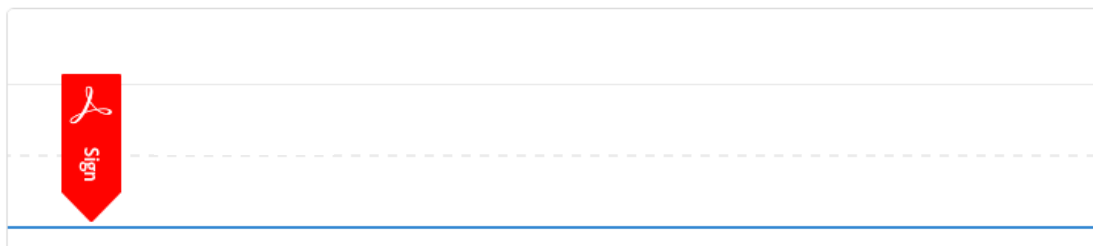

4. Click/Tap the **Sign** button then select "Add Signature"

Adding eSignatures to Digital PDF Forms using a PC

5. To sign, select **"Draw"** (to sign directly) or **"Image"** (to upload a picture of the wet signature). Never use the **"Type"** function for eSignature.

5A. Option 1 – Clients may **DRAW** to write signature.

- This option is good if comfortable signing using a mouse or track pad.
- The drawn eSig must be of good quality and comparably the same as the client's wet signature on paper.
- To redo the drawn eSig, select **clear**.

5B. Option 2 – Clients may use an **IMAGE** of signature

- This option is good if prefer to sign on paper then upload the signature. A scanned image or photo of the wet signature is required to do this.
- Do not ask your client to send you a picture of their signature. You should not have a copy of the client's signature specimen.
- eSig image must be of good quality and comparably the same as the client's wet signature on paper

Adding eSignatures to Digital PDF Forms using a PC

6. After eSig is drawn or image added, **select Apply to add the eSig.**

7. The eSig will appear in the document. **Place and adjust the size of the eSig by dragging the blue box or using the A A icons.**

PDF eSIGNATURE DO'S AND DON'TS

- ✓ eSignature must be comparably the same as the wet signature
- ✓ Make sure the client has Adobe Acrobat Reader installed
- ✓ When using a computer, the client can take a photo of their wet signature, transfer it to their computer, and attach it to the PDF as a signature
- ✗ Do not use the "Type" function in Adobe Acrobat Reader's Fill & Sign feature
- ✗ Do not ask your client to send you a picture of their signature. You should not have a copy of the client's signature specimen.

Adding eSignatures to Digital PDF Forms using a PC

Before submitting, remember to check your client's signed form and ensure that this follows the eSig do's and don'ts.

Tip: If your client's PDF eSignature looks like the ones below, it was most likely typed and your client will need to redo the eSignature using the Draw or Image functions (steps 5A or 5B). Typed signatures will not be accepted.
