THE KEY WORD IS 'GUARANTEED'

1. It shields us from market fluctuations (think of the guaranteed cash benefits of traditional policies as your floor)
2. It can serve as contingency funds for times that we will need money for emergencies as we can take out a loan against the policy (as compared to withdrawing funds from VUL if the market is down or resorting to bank consumer loans that would impose super high interest rates)
3. Anticipated Endowment Benefit (getting regular stream of living income)
