

#JustBCOS You’re an Empowered Sun Lifer!

Learn how to **troubleshoot your way** through these common BCOS Issues and know where to seek **assistance for your specific BCOS concerns!**

- 1. Check out this **updated guide for addressing common issues**

If you or your client encounter this issue in BCOS...	Try doing the following...
You or your client get an error message in any page or cannot use the dropdown button to select a product or your client experiences a quick timeout of BCOS or your client receives a server down error message 	For Advisors: Refresh the page, clear your browser cache, and try again. For Clients: Refresh the page, clear browser cache, and advise them to try again. If the message persists, report this to ATS.
Your client's signature is misplaced in the proposal	Misplaced signatures on proposals is a known BCOS error. New Business will accept these proposals with misplaced signatures for now. Report this to ATS and include the following information: Sun Life product, device used, and the browser version. Important: If the signature is misplaced on a <u>different document</u> this is caused by uploading the document to the <u>incorrect location</u>. Use the reupload function to delete and replace with the correct file and location in BCOS for your client to sign.

Your client cannot sign the BCOS client confirmation	Check that you are: - Using the right BCOS client confirmation - Uploading in the right location BCOS Policy Owner client confirmation (longer one w/ 3 clauses): - Must always be used for <u>all BCOS apps</u> - Will only be signed once by the Policy Owner BCOS Life Insured client confirmation (shorter w/ 2 clauses) - Only for <u>use if the Adult life insured is different</u> from the Policy Owner - Will only be signed by the different Adult Life Insured Also ensure valid ID/s and client photo/s with IDs are clear, and are properly uploaded in BCOS. Upload separate ID image and client photo of back of ID if signature is at the back (ex. PRC).
When opening the BCOS Kit, you get an "unsupported file" error message 	The BCOS Kit is a Zip file, a folder with multiple files. Use a Zip file extractor such as WinZip, 7Zip, or WinRar to extract and use files in the BCOS Kit.
Your client cannot find the system generated email with their BCOS link or the emailed BCOS link has expired	Advise your client to check for their email in their Bulk, Clutter, or Spam folder in case their email has automatically filtered it away from their inbox. You can also resend the BCOS record to your client to trigger a new email and link to be sent to your client. Only the most recent BCOS link sent will be valid.

Your client cannot enter the One Time Password (OTP) and their device screen looks dark 	BCOS is not compatible with devices set on "dark mode" a device display setting that inverts colors. If your client is having difficulty logging in with the OTP and his mobile screen is predominantly black, this means your client is on dark mode. Advise your client to switch this off in his device display settings while using BCOS.
You cannot upload the proposal to BCOS 	Check the file name of your proposal, if it's the long default name from SunSMART, rename the file and try uploading it to BCOS again

2. Preparation is the key: understand which **files you need** to use and **where you should upload them**

BCOS App Document Reminders

Orange files - files that can be signed by the client in BCOS

Files with an */asterisk - universally required files for a BCOS app. Additional requirements are needed for VUL products or for different adult life insured.

Before you send your BCOS app to your client, make sure that you...

- ✓ Have prepared the files, that all applicable files, prior to upload, have **Advisor's signature, client date and location of signing**, and that **all app details are accurate and final. You will not be able to edit any files within BCOS.**
- ✓ Are using the **right documents especially for the BCOS client confirmation/s**
- ✓ Have uploaded the files in the **right location/labelled fields** in BCOS

BCOS will only show the Client Confirmation that needs to be signed by that particular client and will be only be signed once.

If you're unable to submit the App and are receiving the **"Please make sure all required documents are completed"** message
→ check if the requirements are complete and uploaded to the right locations:

Signed documents:

- ✓ Client Signed App Form (with Advisor Signature prior to BCOS upload)
- ✓ Client Signed Client Suitability Assessment (with Advisor Signature prior to BCOS upload)
- ✓ Client Signed Client VUL Guide (if VUL product)
- ✓ Client Signed BCOS Client Confirmation for Owner; i.e. BCOS client confirmation with 3 clauses
- ✓ Client Signed Proposal

Supporting documents:

- ✓ Proof of payment
- ✓ Valid ID (please upload the back of the ID if client signature appears on the back)
- ✓ Owner photo with Valid ID (please upload separate picture of client with the back of the ID if client signature appears on the back)
- ✓ Advisor's Report (p.9) (with Advisor Signature prior to BCOS upload)

If Adult Life Insured is NOT the Owner:

- ✓ Signed BCOS Client Confirmation for LI (if different from owner); i.e. BCOS client confirmation with 2 clauses
- ✓ Insured photo with Valid ID (if different from owner); you may upload this under other documents

✕

Upload other documents

Upload other documents for your client's signature, as well as other supporting documents. If you don't have everything now, you can come back and upload the rest later.

For internal use only

3. Learn where and how to properly seek assistance for your specific BCOS concerns

If you need help with...	You may get in touch with...
BCOS technical Issues and assistance including system errors such as: • “Sorry unknown error” or “Server down” message • Quick timeout on client side • Unable to see client signatures	Advisor Technology Support (ATS) (02) 8555-8888 local 3000 PHIL-ATS@sunlife.com ATS for Advisors on Facebook: https://bit.ly/ATSFBGroup
BCOS process issues including previously submitted BCOS apps that were returned in BCOS	Digital Distribution Phil-DigitalDistribution@sunlife.com Please note that your app processing and approval will still be with the New Business & Underwriting teams.
BCOS app status follow-ups <u>after “Accepted” status in BCOS</u> Tip: “Accepted” is the last status within BCOS and this means that your app has passed initial checking and is queued for further processing. Your app will appear on AHO after it has been encoded by NB and you may monitor progress in your AHO.	NB Followup Phil-Followup@sunlife.com 1. Please follow the subject line format below: Follow up : BCOS <Serial No.> or <Policy No.>/<Name> 2. For concerns other than follow-ups, please send to the appropriate touch point or to the processor of your application/requests. 3. Please specify if you are following up for a BCOS app and indicate BCOS app status.

**Submission of additional BCOS app requirements via email
after BCOS submission**

(such as AOA outside of BCOS)

Tip: You may also submit an AOA within BCOS when you submit your app to Sun Life if only the policy owner needs to sign the AOA.

If a different adult life insured needs to also sign the AOA, please submit it via Phil_NBMatching@sunlife.com.

NB Matching

PHIL_NBMatching@sunlife.com

1. Copy of documents should be clear. It should be properly identified by including the correct name and policy number of the client.
2. Please provide email client confirmation if required.
3. The requirement should be sent to the email address mentioned and not to the NB reviewer or underwriter
4. Reminder: Additional verification may be done if there is a suspicion of irregularity such as tampering.
5. Subject format: BCOS <Serial No.> or <Policy No.>/<Name>
