Client Suitability Assessment

Version 1.1
January 2021

BEFORE YOU START

1. Use SunSMART Client Suitability Assessment (CSA) only when submitting an eApp. You cannot fill out the CSA in SunSMART and print/export it for other submission.
 1. If you are using BCOS, use the regular CSA form from Advisor Home Office.
 2. If you are submitting via CSC, use the CSA app form attached to the paper form.
2. CSA responses should match the product and fund selection in the Proposal. SunSMART will alert you if the selection in CSA does not match the selection in the proposal.

Creating CSA

The screenshot shows the Sun Life SunSMART interface. At the top left is the Sun Life logo. In the center is a 'SEARCH CSA' button. On the right are user and settings icons. Below the search bar is a table with columns: CSA SERIAL NUMBER, LINKED PROPOSAL SERIAL NUMBER, OWNER NAME, UPDATED DATE, CSA STATUS, and ACTION. The first row of data shows a CSA SERIAL NUMBER of CFASCPNB0111112020172337231067, a LINKED PROPOSAL SERIAL NUMBER of FASCPNB011111202017184842402, an OWNER NAME of SUNNY DELA CRUZ, an UPDATED DATE of 11-Nov-2020, and a CSA STATUS of ACCEPTED. The 'Add' button is highlighted with a yellow box, and the 'CSA' tab is also highlighted with a yellow box.

SunSMART will check if the selected fund option matches the Risk Profile score.

If the Fund Option is riskier than the risk profile, the client will need to provide the reason (select from dropdown or input/specify the reason).

IMPORTANT: Selecting a more aggressive fund option compared to the risk profile will require a reason

Link to Proposal

It is recommended to Link New Proposal to minimize mismatch errors.

If you link to an existing proposal, make sure the Proposal Product and Fund Selections in the Proposal match the CSA Product Type (Q3), Risk Profile score, and Fund Options.

Selecting Link New Proposal will bring you to the Proposal Generation in SunSMART, where you can create the Proposal as usual.

Once you reach this step, you are done with CSA!

TRAD – FNA section only

VUL – FNA and Risk Profiling sections
