

SunSMART: Downloading and Basic Troubleshooting

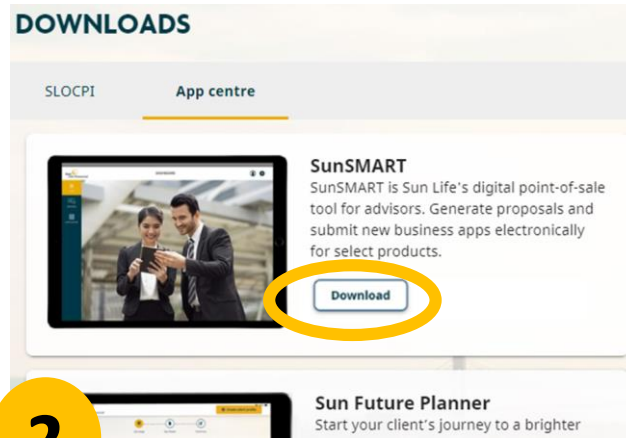

How to download the latest SunSMART from Advisor Home Office

Log in your with Advisor code and Portal password on <https://advisorhomeoffice.sunlife.com.ph>

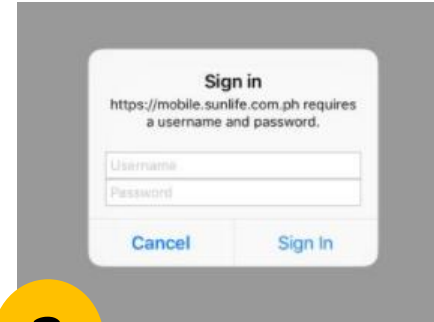

1

On your iPad, log in to Advisor Home Office, tap on **App centre** under **Quick Links**. Alternatively, you may go to **Downloads > App centre**.

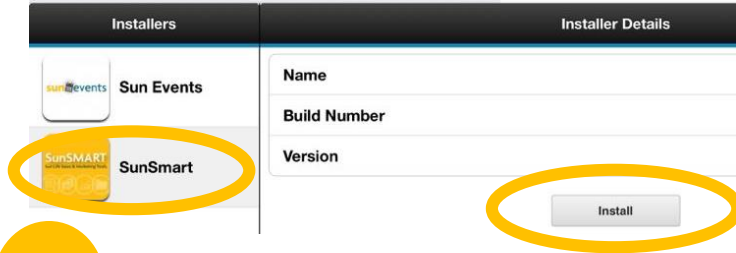

2

Select Download under **SunSMART**.

3

Enter your **advisor code** and **Portal password**.

4

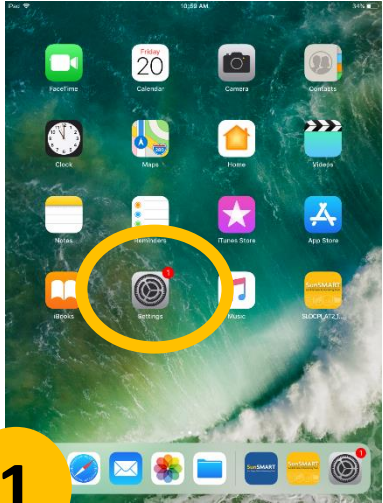

Select SunSMART and tap on **Install**. Check the **SunSMART** icon on your iPad.

BEFORE YOU UPDATE

1. Always sync your proposals regularly to avoid losing client and proposal data.
2. For SunSMART 4.7/1.8 update, please **delete your current SunSMART** from your iPad before downloading the new one from the Advisor Home Office.

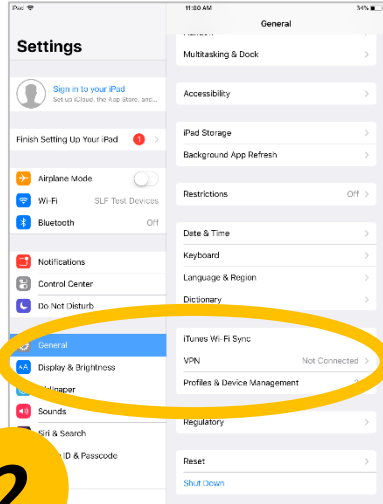

How to fix Untrusted Developer Issue on SunSMART

This means you need to allow the app developer (Sun Life) to have an app installed in your device.

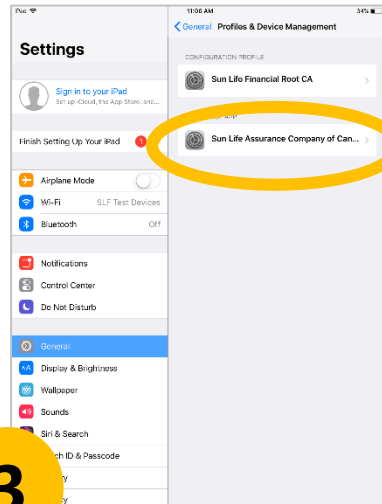

1

On your iPad, tap on **Settings**.

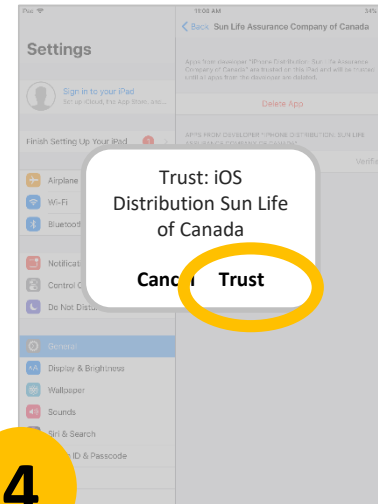

2

Tap on **General**, then **Profiles and Device Management**.

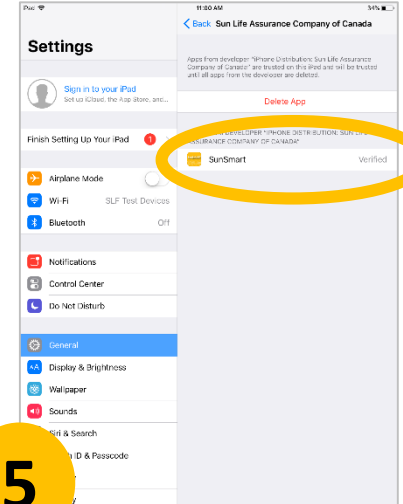

3

Tap on **Sun Life Assurance of Canada**.

4

Tap on **SunSMART**, then **Trust** on the pop up message.

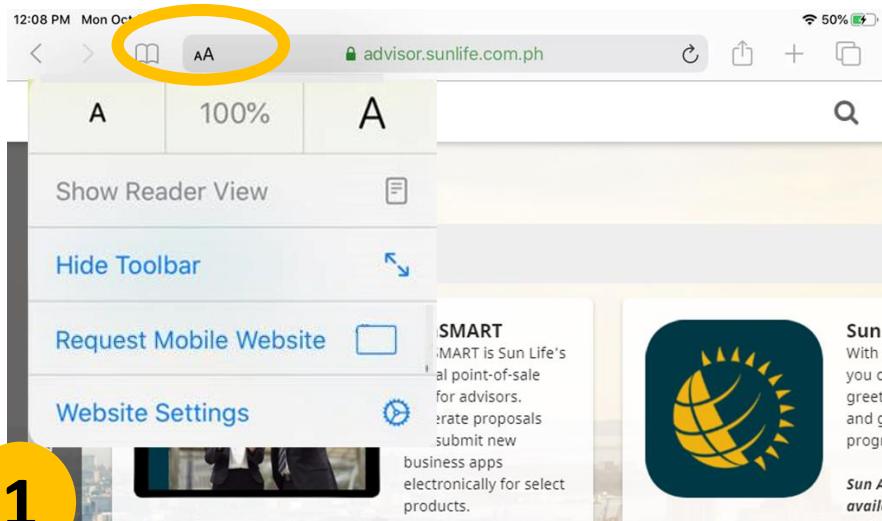

5

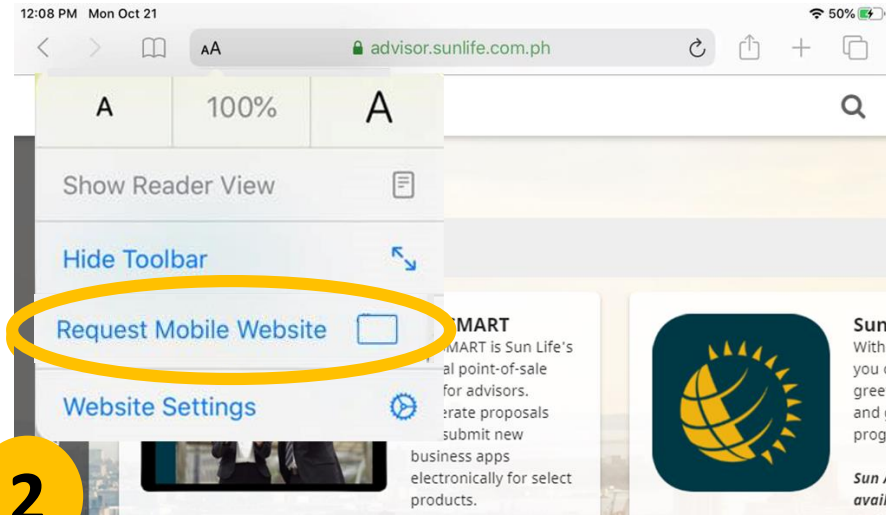

SunSMART will be **Verified**. You may now use SunSMART on your iPad.

What to do if SunSMART does not appear on App Centre

With iOS 13, Safari treats iPads as laptops. Therefore, you need to request for the mobile site.

On **Safari**, tap on the **AA** icon.

Tap on **Request Mobile Website**. You should now be able to see SunSMART and the download button.

Alternatively, you may go to the Settings app on your iPad. Tap on Safari, scroll down, and tap on Request Desktop Website. Next, turn off the switch next to Request On All Websites.

Thank you.
