Electronic Policy (ePolicy) Contract Delivery

ePolicy Contract Bundle

Majority of our products are now available in electronic policy (ePolicy) contract format. The ePolicy contract is accessible via:

The client's registered email address
as indicated in the new business
(NB) application form

The client's My Sun Life Client Portal
account

Both will be available **3 business days after policy settlement**, granted that:

- a) the email address provided is accurate and active
- b) the My Sun Life Portal account has been activated

Refer to the attached "Circular 2021-28 Availability of Electronic Policy Contracts" for the list of the ePolicy-ready products.

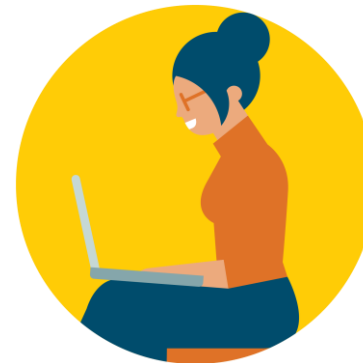

Benefits of ePolicy Contract

Advisor

- Schedule a policy review meeting immediately once you get notified of the ePolicy delivery.
- The policy review can be done online as there is no need to physically deliver the contract and collect the Policy Acknowledgment Receipt (PAR).
- You can refer to the ePolicy for policy review with clients, once it is available in Advisor Home Office (AHO) starting October 2021 (to be announced separately).

Client

- No risk of losing or damaging the contract, since it is uploaded to their My Sun Life Client Portal account.
- Clients can keep their ePolicy in their mobile devices or cloud storage accounts.
- They can also easily forward a copy to their trusted family members via email, for reference.

Name Certification

There is a current system limitation that allows only up to 25 characters for the first name and middle name, and 40 characters for the last name.

If the client's name exceeds these limits, the client's full name will not be reflected in the policy contract.

The contract will be issued with a Name Certification document, which is available in My Sun Life Client Portal*.

To request for a name certification, please send an email to NB:

- To: PHIL-PolReviewers@sunlife.com
- Email subject: Name Cert – <App Serial Number> – <Client's Full Name>
- Message: Include the client's full name for the Name Certification

*Availability of Name Certification document via email will be announced separately.

D.E.W. Tips

- Encode the client's details accurately as it would appear in the policy contract. Ensure that the email address is correctly typed, and that the client still has access to it, to avoid delivery failure of the ePolicy contract.
- If the client couldn't find the ePolicy in their email inbox, advise them to check the spam/junk folder. If it is not found, you can report this to **PHIL-PolReviewers@sunlife.com**. Refer to the attached memo for details.
- Immediately notify the client once the ePolicy is available in email and conduct policy review virtually. Discuss the policy provisions and cooling-off, if applicable.

Cooling-off for products with ePolicy is within 20 days from the date when the soft copy was sent via email.

- During policy review, check and report any changes in the client's insurability to NB/UW by sending the details to **Phil-Followup@sunlife.com**.
- Inquiries on the issuance of policy contracts must be sent to NB-Policy Review team via **PHIL-PolReviewers@sunlife.com**.
